Vinyl Replacement Windows

CERTAINTEED DOUBLE-HUNG
WINDOWS COME WITH STANDARD
FEATURES YOU WOULD EXPECT
TO FIND AS OPTIONS ON MORE
EXPENSIVE WINDOWS.

FORM. FUNCTION.

Our Devon II Windows are designed not just for beauty, but are built to last. State-of-the-art technology is used to create clean window lines that will improve your home's appearance. Using the highest quality materials and sophisticated manufacturing techniques, we produce well-built, strongly constructed, easy-to-install windows that will provide years of comfort for your family.

Envirosealed Spacer System for superior thermal efficiency

Convenient Tilt Latch Mechanism

Spring-loaded night latches allow both sashes to remain partially open for more ventilation

Double cam locks close in opposite directions to create a tighter seal

Patented constant-force stainless steel coil balance system and patented locking pivot bar shoe provide for easy sash operation and removal

Latching Extruded Half Screen

Multi-chambered construction provides thermally efficient air pockets

Both sashes are drop-in glazed for easy glass removal

Thermafect glass package helps reduce heating and cooling costs

Maintenance-free, vinyl extrusions will not stick or swell due to moisture

Patented Detent Clip prevents sash drift by securing top sash in position when fully closed

Fully weatherstripped to keep wind and weather outside

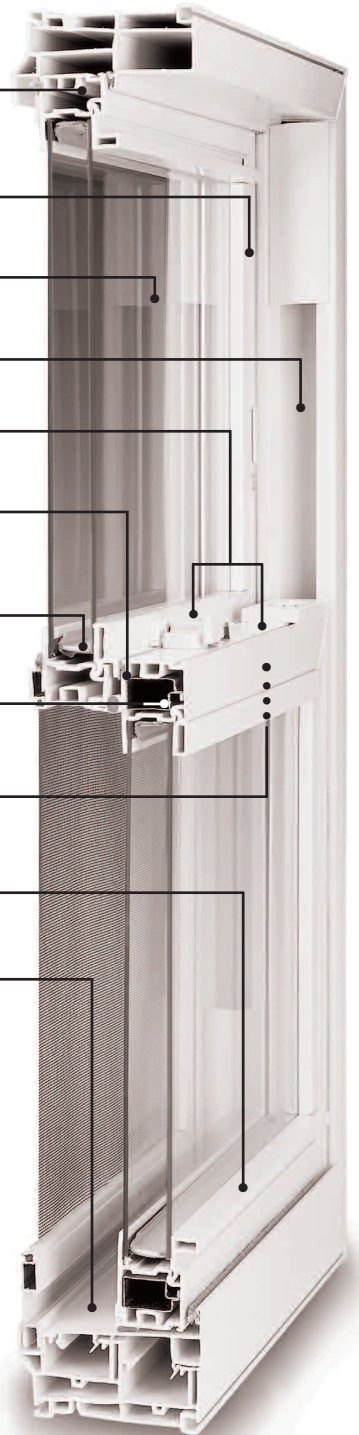

Envirosealed™ Spacer System reduces energy costs

Metal reinforcement in both sashes for added durability

Forced entry resistant Cam Latch - meets new AAMA requirements, provides security in the home

Full length lift rail for easy up and down operation

Sloping sill design prevents interior water leakage
